

Check Modular Valve

50 to 300ℓ/min
25,35MPa

Features

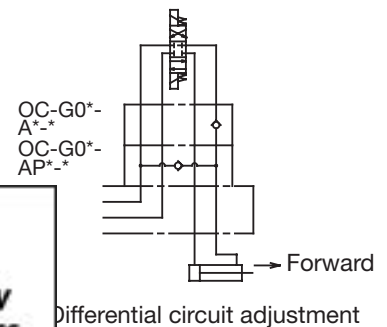

- ① This modular valve is a check valve that prevents reverse-flow.
- ② The 01, 03, 04 sizes include types that can also be used as suction and differential circuits.
- ③ Maximum Operating Pressure: 25, 35MPa {255, 357kgf/cm²}

Specifications

● Handling

- ① Differential circuit can be easily configured at P → B by attaching OC-G** -A* above the OC-G** -AP* on the subplate. (See the figure to the right.)
- ② Note that a sub plate and installation bolts are not included. See pages D-90 through D-95 if these items are required.
- ③ 04 series modular valves do not have an L (DR₂) drain port, so they cannot be used in combination with pressure center type solenoid valves (D).
